---

- Interpersonal & Communication Skills
- Problem Solving
- Attention to detail
- Teamwork
- Leadership
- Microsoft Excel
- Microsoft Word
- AutoCad
- Civil3D
- VSCode

## Cover Letter

To Whom It May Concern

As an enthusiastic individual who loves learning about new technologies, the Software Development Engineer Internship posting piqued my interest. I was excited by the responsibilities and duties, as well as the potential for learning and personal development in my career.

I have worked with Python building web scrapers and with React and Javascript building frontend applications and with ASP dotnet and C# building fullstack applications. I am a fast learner and motivated to advance my capabilities.

My experience in Civil Engineering from the University of Cape Town drew heavily on mathematics and physical sciences along with group work which allowed me to think critically and communicate a desired solution with people from all over the continent.

My eagerness to learn and understand challenging concepts quickly while being cognizant of the needs of others and a bigger picture prepares me to be a successful candidate for your team.

Thank you for your time and consideration.

Best Regards,  
Ra'ees van der Schyff
